I'm exhilarated by nature's beauty and vivid colors, and relish a rock, leaf or moss as much as a mountain or ocean. It is the simplistic nature of life I find most intriguing and the new journey each art piece brings that I enjoy. My aim is a spirited look using bold designs, bringing the essence to the forefront.

Color shift textures are created from liquid dyes on silk painted in freestyle form, and plant shapes using the wax tjanting tool method. Soft pastel is my choice for capturing sea and landscapes during outdoor painting sessions. Watercolor abstraction and studio still life compositions give me more venues. I also express my love of abstract through fashionable silk wearables of scarves, tunics, and silk jewelry. Clay is a recent addition, and now metal forming is thoroughly exciting! Further combinations of silk with clay and metal are just waiting to be made.
