

BARBARA A. SCHAEFER

PHOTOGRAPHY

Photography is a method for capturing moments, preserving a particular view of history at a specific time. Barbara began capturing moments when she was in grade school heading off to summer camp. With her mom's camera and some instruction from her dad, she began her journey to record a bit of history as she encountered and experienced it.

About her photography Barbara says, "My profession working in the astronomy field has afforded me opportunities to be in amazing places during special times, seeing views and conditions others seldom have the opportunity to experience. I've also been fortunate to travel to many parts of the world, to capture images of distant places and cultures. My goal is to see and record images of places, experiences, views and feelings in a different light, to notice details others might miss. Sharing these images, giving others the opportunity to also see and experience, is, for me, the most rewarding part of photography."
